DREADNAUGHTS AND CRUISERS HAVE ARRIVED IN FRANCE

Transport Jupiter Reaches France Ahead of Troops

(By Associated Press.)

PARIS, June 7.—A large American transport arrived in France today under protection of an American warship, bringing wheat for the American troops, who are to come later. Preparations are being made for the reception of the American troops. A number of bases similar to those of the British army have been organized.

(By Associated Press.)

WASHINGTON, D. C., June 7.—The naval collier Jupiter arrived in France today with 10,500 tons of wheat. The Jupiter's sailing from America was unannounced. The collier Jupiter was built at Mare Island and is one of the navy's largest boats. She carries other supplies besides wheat.

SECOND STEP IN THE DRAFT TAKEN

(By Associated Press.)

WASHINGTON, D. C., June 7.—The war department is working on the second step of the draft, the selection by lot of the proportion of those registered. It will take ten days to complete the nation wide tabulations. Returns indicate that over half the men registered claimed exemption or gave facts which might exempt them. The actual decision will be left to local authorities deciding on each individual case. As the registration figures came in last night the work of preparing for the next great step proceeded without interruption. Already the regulations which will govern exemptions are virtually complete. It is probable that a few days will see the work of assembling the boards in each community under way. The personal honor of the president, of Secretary Baker, and of every member of Congress who voted for the bill stands pledged to the statement that even handed justice and fairness to all men, high or low, white or black, will govern in the great task. Much must be done before the names of those who will compose the armies can be enrolled. Millions of registration cards must be examined and classified. Those who are wholly unfit physically for a soldier's grim business must be eliminated; the quotas of the states must be assigned; the machinery for distributing this quota equally through every remote county or precinct of each state must be perfected.

The local exemption boards will almost equal in number the registration precincts. Assurance has been given that a man's own neighbors will be the judges to pass up on his name. There were more than 125,000 precincts and equal decentralization will characterize the exemption machinery. President Wilson, upon which the law imposes the duty of selecting and appointing all these boards, probably will delegate this authority to the state officials. Their loyal and enthusiastic response exemplified in the registration is certain. Then comes the appointment of the boards of review to which each man who may be chosen by his local board for army duty may carry his case if he feels himself wronged. These, broadly speaking, will be created for each federal judicial district and the president may appoint them himself. There is no statement as yet available as to the process by which men will be drawn to appear before the exemption boards. Secretary Baker has stated that something in the nature of a jury wheel might be applied, but beyond that no information has been given out.

OWNER OF LONDON TIMES WILL SUCCEED BALFOUR ON MISSION

(By Associated Press.)

LONDON, June 7.—Lord Northcliffe, at the request of the war cabinet, has accepted the position as head of the British war mission in the United States in succession to Arthur J. Balfour, who is to return to his duties at the foreign office.

Lord Northcliffe's task will be to co-ordinate the various British missions and act in concert with the missions of the entente allies and of the American and Canadian governments. Lord Northcliffe is well known as a writer and newspaper proprietor. He has been active in British political affairs and recently has been engaged in vigorous support of Premier Lloyd George's home rule for Ireland policy.

J. G. KIRCHEN WILL REMOVE TO RENO

GOES THERE TO ESTABLISH CENTRAL HEADQUARTERS FOR MINING INTERESTS

On the first day of July John G. Kirchen, general manager of the Tonopah Extension Mining company and allied interests, will remove to Reno where he will take up his residence. Mr. Kirchen will retain his position as general manager and Capt. Aline Case, lately of the West Tonopah, will succeed to the active management with the title of general superintendent. Capt. Case and family will occupy the present Kirchen home.

The object of the change is to expedite business as it was felt necessary owing to the extended operations of the Schwab interests to have an office at a more central point than Tonopah. Those interests include the Springer Consolidated company in Butte county, California; the Yerlington Mountain Copper company with mines at Schurz and Golconda; the Tonopah and Manhattan companies, besides other interests distributed over the state. Mr. Kirchen has leased the Sol. Levy house on the south side of Reno, one of the most desirable homes in the river side city. Mr. Kirchen has been a resident of Tonopah since April 16, 1906.

Capt. Case will be succeeded at the West Tonopah by Homer Williams, who has been a surveyor at the Extension.

He made public excerpts from letters received at the prison confiscated from women who had been put in touch with prisoners through a league organized for uplift work. Secretary Daniels said: "It was a splendid piece of work. We are

now considering a promotion for Clark, who well deserves it." The state department did not announce the name of the Silver Shell until the Paris dispatch carried it, fearing to make the ship the object of further attack, as it is believed was done by submarines in the case of the Mongolia, which has repeatedly been attacked since engaging a submarine.
